

Gopikrishna Mahalingam

Computer Engineering Student | Java Full-Stack Development | Web Development

Contact: 7039918751 | Email: gopikrishna.mahalingam@gmail.com | [LinkedIn](#) | [Github](#) | [Leetcode](#)

PROFILE

Second-year Computer Engineering student with a strong interest in Java full-stack development, backend engineering, databases, and problem solving. Hands-on experience building and deploying responsive web projects using HTML, CSS, and JavaScript, with ongoing development of Java, Javascript, SQL, DBMS, Data structures,.Eager to contribute to part-time internships and student software projects while continuing to strengthen practical engineering skills.

EDUCATION

Bachelor of Technology in Computer Engineering

Status: 2025 - present

Institute: Vivekanand Education Society's Institute of Technology, Chembur, Maharashtra

Affiliation: University of Mumbai

2nd Year | CGPA: 9.85

Higher Secondary Education [XII] (PCM)

Year: 2024-2025

Percentage: 93.4%

School: St. Joseph High School CBSE, Panvel, Maharashtra

Senior Secondary Education [X]

Year: 2022-2023

Percentage: 89.2%

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML, CSS

Web Development: DOM Manipulation, Events, Form Validation, Responsive Web Development

Java / Backend: Object-Oriented Programming, Collections (JCF), Exception Handling, AWT

Databases: MySQL, JDBC, Relational Model, ER/EER Model

DSA: Arrays, Strings, Stacks, Queues, Kadane's Greedy Algorithm; LeetCode practice

Tools: Git, GitHub, VS Code, Netlify

PROJECTS

Netflix Clone — HTML, CSS, JavaScript | [Github link: [Netflix_Clone](#)]

- Built a responsive Netflix-inspired front-end to practice layout, styling, navigation, and component-like page organization.
- Completed the project and published it through GitHub and Netlify.

Apple Website Clone — HTML, CSS, JavaScript | [Github link: [Apple_Clone](#)]

- Recreated key Apple-style web pages with responsive layouts and interactive front-end behavior.
- Version-controlled the project with Git/GitHub and deployed the completed website on Netlify.

Student Management System — HTML, CSS, JavaScript (In Progress) | [Github link: [Student_Management_System](#)]

- Developing a client-side CRUD application for adding, validating, displaying, and removing student records.
- Implemented DOM selection/manipulation, event listeners, form validation, JavaScript objects, arrays, classList, and form reset.

ACTIVITIES & EXPERIENCE

- Participated in Smart India Hackathon 2026, Adobe University Hackathon 2026, Code Innovate Impact, DevCrest and others.
- Regularly practice programming problems on LeetCode and build projects to strengthen practical development skills.

CAREER OBJECTIVE

Seeking a part-time software development internship or student opportunity where I can apply Java, web development, SQL, and problem-solving skills, gain real-world development experience, and grow toward a Java full-stack engineering career.

Undertaking

This is to state that the information provided above is true and correct to my knowledge and understanding.

Yours sincerely

Gopikrishna Mahalingam
